MobiTech Fest Finalists Announced - App Dev Platforms & Cloud Synchronizers in Running

The finalists presenting at this week's MobiTechFest East venture conference in Cambridge, Mass., have been announced. The winner will receive a \$50,000 prize package.

The 13 companies selected to present at MobiTechFest seek a range of funding seed - first institutional round, additional funding, Series-A and B rounds - from \$2 million to \$20 million for development, manufacturing, launch, acceleration or expansion.

The finalists are:

- AFK Interactive's M4 mobile development platform allows online games publishers to easily extend their games' features, communities, and virtual marketplaces to all mobile platforms.
- aKos Technology Corporation, based in Schaumburg, IL, is an award-winning mobile money transfer company.
- CaptureCode, a Massachusetts based company, provides mobile marketing, integrated m-commerce and CRM solutions.
- Cyandia, based in Syracuse, NY, delivers rich, synchronized content on any HTML5 capable device, in any location.
- Human Engines, based in San Diego, CA, is a software development company focused on delivering cutting-edge user experience software for mobile & consumer electronics devices.
- iBuildApp, is a Do It Yourself automated engine for building mobile applications, magazines, eBooks without any programming skills.
- iGenApps based in Guaynabo, PR, is the developer of a patent-pending, application generator platform for mobile devices. iM@ (pron. "I'm at"), a Westport, CT based mobile content & messaging provider with a partner leveraged, hyper-local advertising and transaction revenue model.
- Moofwd, based in Princeton, NJ, is a mobile app development foundry that provides a platform for enterprises to mobilize their business processes and systems .
- neXva based in San Diego, CA, is the creator of a unique end-to-end mobile app distribution platform .
- Telcare, based in Bethesda, MD, has developed the world's first cellular-enabled glucose meter.
- Touchnote, based in London, England, is a developer of an application that turns your photos into real picture postcards.
- Vyycore with operations in Israel and Santa Clara is a fabless design startup for Predistorter and Power Amplifier Solutions for the handset market.
